

IN THE CLAIMS:

The text of all pending claims, (including withdrawn claims) is set forth below. Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~striketrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

1. (currently amended) A system of obtaining various image data provided by a server connected to a network using a Web browser in a client, and utilizing the data in an application of the client, comprising:

a unit obtaining a dragging-and-dropping operation; and a copying-and-pasting operation of said various image data provided by the server which are displayed on the Web browser in the client;

a unit inserting ~~the image data~~ into the application of the client by dragging and dropping or copying and pasting ~~the said various~~ image data provided by the server which are displayed on the Web browser in the client; and

a unit obtaining, together with the various image data provided by the server which are displayed on the Web browser in the client, a URL at URLs in which the said various image data is are published; ~~and~~ information relating to ~~the said various~~ image data, and managing the URL and information relating to said various image data as attributes of the said various image data.

2. (canceled)

3. (currently amended) A CAD system of obtaining various CAD parts data provided by a server connected to a network using a Web browser in a client, and utilizing the data in a CAD application of the client, comprising:

a unit obtaining a dragging-and-dropping operation; and a copying-and-pasting operation of said various CAD parts data provided by the server which are displayed on the Web browser in the client;

a unit inserting ~~the CAD parts data~~ into the CAD application of the client by dragging and dropping or copying and pasting ~~the said various~~ CAD parts data provided by the server which are displayed on the Web browser in the client; and

a unit obtaining, together with the various CAD parts data provided by the server which are displayed on the Web browser in the client, a URL at URLs in which the said various CAD

parts data is ~~are~~ published, ~~and~~ information relating to ~~the said various~~ CAD parts data, ~~and~~
~~managing the URL and information~~ as attributes of the ~~said various~~ CAD parts data.

4. (canceled)
5. (original) The CAD system according to claim 3, wherein
when the CAD parts data is dropped or pasted from the Web browser, the data is
automatically converted into a CAD application format of the client and then inserted.
6. (previously presented) The CAD system according to claim 3, further comprising
a unit referring to an original Web page based on a URL managed as an attribute of the
CAD parts data inserted into the CAD application.
7. (previously presented) The CAD system according to claim 3, further comprising
a unit generating a URL list from a URL managed as an attribute of plural pieces of CAD
parts data inserted into the CAD application.
8. (original) The CAD system according to claim 7, further comprising
a unit obtaining updated information about a Web page corresponding to each URL of
the URL list, and notifying a user of the information.
9. (previously presented) The CAD system according to claim 3, further comprising
a unit obtaining updated information on a Web page corresponding to the inserted CAD
parts data using a URL managed as an attribute of the inserted CAD parts data, and reflecting a
change of information about the inserted CAD parts data.
10. (currently amended) A method of obtaining various image data provided by a
server connected to a network using a Web browser in a client, and utilizing the data in an
application of the client, comprising:
obtaining a dragging-and-dropping operation, ~~and~~ a copying-and-pasting operation ~~of~~
said various image data provided by the server which are displayed on the Web browser in the
client;
inserting ~~the image data~~ into the application of the client by dragging and dropping or
copying and pasting ~~the said various~~ image data provided by the server which are displayed on

the Web browser in the client; and

obtaining, together with the various image data provided by the server which are displayed on the Web browser in the client, a URL at URLs in which the said various image data is are published; and information relating to the said various image data, and managing the URL and information relating to said various image data as attributes of the said various image data.

11. (canceled)

12. (currently amended) A method of obtaining various CAD parts data provided by a server connected to a network using a Web browser in a client, and utilizing the data in a CAD application of the client, comprising:

obtaining a dragging-and-dropping operation; and a copying-and-pasting operation of said various CAD parts data provided by the server which are displayed on the Web browser in the client;

inserting ~~the CAD parts data~~ into the CAD application of the client by dragging and dropping or copying and pasting the said various CAD parts data provided by the server which are displayed on the Web browser in the client; and

obtaining, together with the various CAD parts data provided by the server which are displayed on the Web browser in the client, a URL at URLs in which the said various CAD parts data is are published; and information relating to the said various CAD parts data; and managing the URL and information as attributes of the said various CAD parts data.

13. (canceled)

14. (original) The method according to claim 12, wherein
when the CAD parts data is dropped or pasted from the Web browser, the data is automatically converted into a CAD application format of the client and then inserted.

15. (original) The method according to claim 12, further comprising
referring to an original Web page based on a URL managed as an attribute of the parts data inserted into the CAD application.

16. (currently amended) A computer-readable storage medium storing a program used to direct a computer to perform the steps of obtaining various image data provided by a

server connected to a network using a Web browser in a client, and utilizing the data in an application of the client, comprising:

obtaining a dragging-and-dropping operation; and a copying-and-pasting operation of said various image data provided by the server which are displayed on the Web browser in the client;

inserting ~~the image data~~ into the application of the client by dragging and dropping or copying and pasting ~~the said various image data~~ provided by the server which are displayed on the Web browser in the client; and

obtaining, together with the various image data provided by the server which are displayed on the Web browser in the client, a URL at URLs in which the said various image data is are published; and information relating to the said various image data, and managing the URL and information relating to said various image data as attributes of the said various image data.

17. (canceled)

18. (currently amended) A computer-readable storage medium storing a program used to direct a computer to perform the steps of obtaining various CAD parts data provided by a server connected to a network using a Web browser in a client, and utilizing the data in a CAD application of the client, comprising:

obtaining a dragging-and-dropping operation; and a copying-and-pasting operation of said various CAD parts data provided by the server which are displayed on the Web browser in the client;

inserting ~~the CAD parts data~~ into the CAD application of the client by dragging and dropping or copying and pasting ~~the said various CAD parts data~~ provided by the server which are displayed on the Web browser in the client; and

obtaining, together with the various CAD parts data provided by the server which are displayed on the Web browser in the client, a URL at URLs in which the said various CAD parts data is are published; and information relating to the said various CAD parts data, ~~and managing the URL and information as attributes of the said various CAD parts data.~~

19. (canceled)

20. (original) The medium according to claim 18, wherein when the CAD parts data is dropped or pasted from the Web browser, the data is

automatically converted into a CAD application format of the client and then inserted.

21. (original) The medium according to claim 18, further comprising referring to an original Web page based on a URL managed as an attribute of the parts data inserted into the CAD application.

22. (currently amended) A program used to direct a computer to perform the steps of obtaining various image data provided by a server connected to a network using a Web browser in a client, and utilizing the data in an application of the client, comprising:

obtaining a dragging-and-dropping operation; and a copying-and-pasting operation of said various image data provided by the server which are displayed on the Web browser in the client;

~~inserting the image data~~ into the application of the client by dragging and dropping or copying and pasting ~~the said various image data~~ provided by the server which are displayed on the Web browser in the client; and

obtaining, together with the various image data provided by the server which are displayed on the Web browser in the client, a URL at URLs in which the said various image data is are published; and information relating to ~~the said various image data~~, and managing the URL and information relating to said various image data as attributes of ~~the said various image data~~.

23. (canceled)

24. (currently amended) A program used to direct a computer to perform the steps of obtaining various CAD parts data provided by a server connected to a network using a Web browser in a client, and utilizing the data in a CAD application of the client, comprising:

obtaining a dragging-and-dropping operation; and a copying-and-pasting operation of said various CAD parts data provided by the server which are displayed on the Web browser in the client;

~~inserting the CAD parts data~~ into the CAD application of the client by dragging and dropping or copying and pasting ~~the said various CAD parts data~~ provided by the server which are displayed on the Web browser in the client; and

obtaining, together with the various CAD parts data provided by the server which are displayed on the Web browser in the client, a URL at URLs in which the said various CAD parts data is are published; and information relating to ~~the said various CAD parts data~~, ~~and~~

~~managing the URL and information as attributes of the said various CAD parts data.~~

25. (canceled)

26. (original) The program according to claim 24, wherein
when the CAD parts data is dropped or pasted from the Web browser, the data is
automatically converted into a CAD application format of the client and then inserted.

27. (original) The program according to claim 24, further comprising
referring to an original Web page based on a URL managed as an attribute of the parts
data inserted into the CAD application.

28. (currently amended) A system of obtaining various image data provided by a
server connected to a network using a Web browser in a client, and utilizing the data in an
application of the client, comprising:

means obtaining a dragging-and-dropping operation; and a copying-and-pasting
operation of said various image data provided by the server which are displayed on the Web
browser in the client;

means for inserting ~~the image data~~ into the application of the client by dragging and
dropping or copying and pasting ~~the said various image data~~ provided by the server which are
displayed on the Web browser in the client; and

means for obtaining, together with the various image data provided by the server which
are displayed on the Web browser in the client, a URL at URLs in which the said various image
data is are published; and information relating to ~~the said various image data~~, and managing the
~~URL and information~~ relating to said various image data as attributes of ~~the said various image~~
data.

29. (previously presented) A method, comprising:
allowing a user to insert an image into an application; and
updating an image attribute in the application with a URL at which the image is available
and with image identification information relating to the image.

30. (previously presented) A method, comprising:
allowing a user to insert a CAD part and part image into a CAD application; and

updating a CAD part attribute of the CAD part in the CAD application with a URL at which the CAD part and part image are available and with CAD part identification information relating to the CAD part.

31. (currently amended) The CAD system according to claim 3, wherein the ~~URL~~ isURLs are added automatically.

32. (currently amended) The CAD system according to claim 3, wherein the URLs and information are managed as a list of attributes of the CAD parts data.

33. (currently amended) The CAD system according to claim 3, wherein the attributes include the URLs and a title of the page at each of the URLs.

34. (currently amended) The CAD system according to claim 3, further comprising:
discarding the CAD parts data when use of the application is finished; and
using the URLs to obtain the CAD parts data as needed for subsequent uses of the application.

35. (currently amended) The CAD system according to claim 3, further comprising updating the URLs and other information associated with a drawing.

36. (previously presented) The CAD system according to claim 3, wherein the image is comprised of a plurality of parts each associated with a separate URL.
